Project Experience

Popular Movies - github.com/jmadev/PopularMovies

- Android application that allows user to discover the most popular movies playing.
- Fetches data from Internet with theMovieDB API.
- User can view and play trailers, read reviews of a selected movie.
- Allows user to mark and save movies as favorite locally.

Work Experience

City of Los Angeles Department of Building & Safety *As-Needed Clerk Typist*

Van Nuys, CA | *February 2013 - Present*

- Helped Technology Service Bureau set up workstations, fix computer related problems, answer calls at Help Desk.
- Screened customers at public counter to determine what documents they need to obtain.

California Association of Realtors *IT Intern*

Los Angeles, CA | *July 2015 - December 2015*

- Took inventory of hardware, cable management.
- Assisted with solving tickets and troubleshooting for computers running Windows.
- Researched possible devices to be upgraded (e.g., RAM, projectors, printers).
- **C.A.R.Pass**
 - Created a web application that creates an Apple Pass using Java.
 - Searches SQL Server for matching National REALTOR® Database System ID (NRDS ID) to retrieve a member's information (e.g., name, birth date, nrdsid, email, website) which will be used to set pass information.
 - Created a local Tomcat server to run application locally.
 - Used JSP to create a test web page to search NRDS ID, download, and email the pass.
- **zipForm Document/Form Retriever**
 - Created an application with a GUI that consumes zipForm Web Services to search for transaction documents linked with a member's ID.
 - Displays a list of transaction documents with the option to save the files to your computer.
